

A national verified price monitoring platform for Somalia.

SPI helps Somalia collect, verify, and publish market price evidence from vendors and market monitors so that citizens, businesses, NGOs, UN agencies, and public institutions can compare prices with full confidence.

Why Somalia Needs SPI

- **Fragmented prices**
No single source for verified commodity prices across districts.
- **Inflation visibility**
Government lacks real-time market-level price signals.
- **Household risk**
Families overpay without price comparison tools.
- **Procurement gaps**
Institutions use unverified quotes for planning.
- **Early warning**

Platform Features

- ✓ Verified price tracking across districts
- ✓ Household basket calculator
- ✓ Approved vendor listings
- ✓ Discount and ad visibility
- ✓ Admin review workflow
- ✓ Bilingual (English / Somali) items

Data Governance Workflow

Government Value Proposition

Area	Benefit for Government and Institutions
Evidence-based decisions	Access verified price data to support policy, procurement, and planning.
Price trend monitoring	Track commodity price movements across regions and districts.
Market transparency	Published approved prices increase accountability for vendors and markets.
Household affordability	Citizens can compare prices and identify the cheapest available options.
Early warning signals	Sudden price spikes trigger review flags before they escalate.

Partnership Call to Action

Partner with Somalia Price Index to strengthen national market intelligence and digital price transparency. SPI is ready for government integration, data-sharing agreements, and co-funded expansion across regions.
